Co-op Spotlight - Jamie Kilkenny

Jamie Kilkenny, Fourth Year Industrial Systems Engineering Student Summer 2009 Work Term with the Wind Energy Institute of Canada (WEICan) Prince Edward Island

About WEICan.....

WEICan is a leader in wind energy research and development in Canada and has enjoyed this role for more than 25 years since it began operations in the early 80s. Consequently, WEICan plays a key role nationwide in advancing the development of wind energy through research, testing, innovation and collaboration. Learn more at: www.weican.ca

Jamie's Work Term at WEICan was spent.....

- Analyzing data from turbine instrumentation
- Generating reports to fulfill WEICan contracts with turbine manufacturers
- Developing projects in WindPRO, a wind energy software used to model wind farms
- Investigating turbine manufacturers and other test sites
- Assisting with the assembly and disassembly of different small turbines on the site
- Enjoying life and experiencing the vibrant culture of Canada's smallest province
- Meeting wonderful people and making friendships that will last a lifetime!

"Having a co-operative education work term at the Wind Energy Institute of Canada has been a very rewarding experience. The people who work at the institute have an abundance of knowledge on the many aspects of small wind turbine testing and certification. They are patient and eager to teach and share new perspectives on how to advance the development of wind energy. I am grateful for the valuable insights into the renewable energy industry I have acquired, and will continue to use the many skills I have been able to develop while working at WEICan."
