

Gary Wedge retires from the Wind Energy Institute of Canada after 28 years of service...

22 December 2010

Gary Wedge, WEICan's senior Electronics Technician will be retiring at the end of 2010 after 28 years of service at WEICan.

In May of 1982 Gary was hired to work for WEICan, formerly the Atlantic Wind Test Site, and has since made many contributions to WEICan. His job has kept him in western PEI most of the time with excursions to: the North (Cambridge Bay), California, India, and Russia. Gary's experience and knowledge has ensured that he always had a lot to contribute to our Technical Team.

Gary Wedge – 2010 – on the top of a wind turbine at North Cape

Gary has not only seen, but participated in, the growth of wind energy in PEI. He has worked on the first wind turbine installed at North Cape the Bergey 1000, a 1kW. He was also, many years later, involved in the installation of the first wind farm in the Atlantic Provinces at North Cape, PEI.

WEICan staff are very sad to see him go, but wish him all the best in his retirement.

Gary you will be missed!
